Some people think that training your body is useless. Whereas others do not agree. They suppose that practising a sport makes our health better.

First of all, different kinds of sport help us to keep our bodies strong, develop our muscles. Nowadays a lot of people are still suffering because of big problems at work or school. And, to my mind, exercising can help you to get rid of stress and negative emotions or feelings.<sup>75</sup>

However, exercise and sport sometimes may be harmful for people if they do not know about health problems. That is why, you should check your health and train only with your instructor. He always will be ready to help you and show exercises. And you will not hurt yourself.<sup>120</sup>

Well, sport could be very dangerous for us. However, it helps to communicate with other people and make new friends. I think that such activities unite people. And all of them have the aim to keep fit, strong.<sup>162</sup> Also, sport is not ~~only~~ about your body, it is about your soul, developing minds.

To sum up, I should say that there are different opinions. It seems that taking care of your body is not important. But, in actual fact, your future life depends on how much you love your health. I think that only people, who appreciate themselves, are ready to spend hours at gyms.

How important is it to practise a sport regularly when you are in your teens?

To begin with I would like to say that health is one of the most important things in human's life. Everyone tries to improve their health doing different sport exercises. And nowadays this idea is quite popular among teenagers.

On the one hand different physical exercises help to keep fit and strong. At the same time we can make new friends and discover new things about our old friends. Today's governments often build new sport playgrounds that are usually used by young people. While we are doing sport. To my mind our government is really interested in growing up healthy young generation that is why they build new sport grounds where everyone can find place for exercising.

On the other hand we don't have so much to practise regularly because we are very busy with school, extra-lessons and doing house work. Unfortunately, many of teens don't know any sport's rules and it is really hard for them to communicate with others who know something about game rules. It

In conclusion, I would like to say that importance of sport today is very high today, that is why everyone has to try to do different exercises regularly. Practising a sport - It can help us either find new friend and keep fit. The most important thing in it is that you must be open for dialog to open new things for you everyday and try to help new people who doesn't know something about sport.

~~A~~ several centuries ago people exercised much more than now. They worked on farms all day in order to feed themselves. Nowadays, we don't have to physically work ~~from~~ before dawn just to live. And that is why people have started to ~~gain~~ gain weight. Solution is simple: amount of ways to stay fit is unbelievably big, ~~and for teen doing this is way easier than for an adult, because teenagers do not work eight hours a day.~~ So why is it important?

Supposingly, the main reason for a teenager to start doing sport is to get a good-looking body. People usually do not care that much about health side of exercises. Besides, being fit can help to avoid many diseases, such as problems with heart or diabetes, especially with the passing of years.

The second reason for teens to do sports is to increase their self-esteem. Everyone knows that teenage years often come with problems with mental health, and low self-esteem is just one of them. While exercising, people learn how to love their bodies, and this, without a doubt, makes them feel better about themselves.

Lastly, keeping fit helps teen's social life. It might sound ~~cruel~~ but others would rather befriend someone they find attractive or at least not ugly, than someone they don't. Sadly, but for the main part of people "attractive" is similar to "fit", and "ugly" is similar to "fat".

Everyone knows that sport is important. Unfortunately, <sup>not</sup> everyone use this knowledge right and exercise regularly, on the daily basis. Some people, though, <sup>simply</sup> don't have enough time for sport because of their part-time jobs ~~or other important things to do. That is why you can say that going to a gym is a privilege for rich people.~~ Happily, teens do not have a full-time job, ~~so they have more free time.~~ So if a teen wants to make his life better and has enough free time for it, he should try ~~sport~~ exercising.

Health is one of the most important things, especially in our days. Our daily life depends on how ~~do~~ we feel doing different activities and is our health good. I heard the phrase "you are what you eat" and I absolutely agree. But in my opinion, our physical activities isn't less important.

There are a lot of interesting ways to exercise, so everyone can find their favourite sport or exercise, ~~which~~ they will enjoy.

What's more, when you exercise regularly, you become stronger and more healthy, it means that you can walk for a long time, run faster, jump higher and so on.

Fitness makes you burn great amount of calories and you will not become overweight. Fit people have more proteins and healthy fats than carbs in their bodies, which makes their skin shiny, hairs and nails stronger, and of course it makes our bodies look better.

But I don't think ~~x~~ that sport should take all your free time. Don't forget about friends, school and family.

At ~~the~~ the end I want to say, that sport is very important and ~~we~~ it is good for all of us.

The importance of exercise and sport in our daily lives is really huge. Many people go to the gym, have healthy lifestyle and like sport, but many people hate it. Who is right and who is not? I'll try to explain my opinion. I think, sport is really important to every human.

As for me, I go to the gym three times a week with my friend. Sport helps people to be healthy, also scientists have found that sport is good for brain work too. Many people may not have their diseases if only they had done morning exercises. Also we should keep in our mind, that sport is connected with lifestyle, and people who do sports are not smoking or drinking alcohol, that helps them to be healthy too. If you are sporty - you automatically looks better, sport keeps people together and you can make new friends on your trains or in the gym.

With sport you can upgrade your muscles, body and mind. I cannot imagine any argument against sport. Only humans' procrastination can stop you. Finally, sport is irreplaceable.

How important is it to practise a sport regularly when you are in your teens?

Health is an extremely important thing for all of the people in our time. Based on my experience being a teenager, I definitely can say that most of teenagers spend <sup>30</sup> plenty of time sitting in front of their computers or doing homework. Of course, it makes a bad impact for their health, stamina, etc. So, why doing sports is so important? K1

Firstly, doing sports is a good thing to keep your body strong, raise your stamina and just keep fit. It also provides you from different diseases, such as heart disease, problems with backbone, obesity, etc. Furthermore, when you do fitness, your dopamine is raising up and your emotional "health" is getting better.

Secondly, practising a sport regularly can make a big value for your social life. It's a good chance to get acquainted with new people, learn something new from them or maybe meet your future wife or husband! Also, doing sports can help you to offload your burdens, because it's a kind of therapy, when you can put all your bad emotions and feelings into physical power.

Lastly, if you do sports regularly, you could upgrade your skills, and, for example, take part in competitions, what is also good for your future, because in many universities you can get some bonuses, which will raise the chance of your acceptance.

All in all, in my opinion + doing sports regularly not only makes your health better, but gives you a lot of opportunities and just can change your whole life!
