Основываясь на данных графика:

$a(s) = a_0 + \epsilon s$ , где  $\epsilon$  - ускорение ускорения

$$\epsilon = \frac{\Delta a}{s} = \frac{a' - a_0}{s} = \frac{6 - 2}{2} \text{ с}^{-2} = 2 \text{ с}^{-2}$$

2

$$v^2 = a(s) = 2 \mu / c^2 + \epsilon s = v_0^2 + 2 \mu s + \frac{\epsilon s^2}{2} = 2 \mu s + s^2 \Rightarrow \text{при } s = 2 \mu$$

$$v^2 = (2 \cdot 2 + 2^2) \frac{\mu^2}{c^2} = 8 \frac{\mu^2}{c^2} \Rightarrow v = 2\sqrt{2} \mu / c$$

Order:  $v = 2\sqrt{2} \mu / c$
